**NEW MOON**  
*In the Light of Rowan - Luis*

The next New Moon of 2012 is Rowan. The vibration of this Divine Wisdom initiates at 11:39:16 pm Pacific Time on Jan 22<sup>nd</sup>. The Moon and the Sun come together at 2 degrees 41 minutes within the Zodiac sign of Aquarius. Be sure to check out the News Page on [www.facesofwomanspirit.com](http://www.facesofwomanspirit.com) to read about the cosmic alignment on New Moon day. Also, at New Moon, the celebration of the Chinese New Year of the Black Water Dragon begins. According to the tradition of the Dragons, the year is a positive year, filled with innovation, bravery and passion. The dragon is considered unpredictable, untouchable, and mysterious. This year the Dragon is considered a Transition messenger in the Chinese philosophy as the energy is moving from the Wood cycle to the Fire cycle. With that in mind, how might it translate to the goings-on of Rowan and our continued movement into the New World Garden of Life?

Rowan/Aquarius is highlighted as the New World/New Age of consciousness and is most certainly anchoring the intention of the Living the Moment rather than the past. It is a power of the Transpersonal Approach<sup>SM</sup> to living. Calling all to the awareness of being the Living Dimensions of All Existence and therefore living Spiritually, Emotionally, Mentally, Physically, Ego-wise and Soul-wise in Oneness Awareness. The vibration of Rowan does bring about the power of innovation, the doorway of understanding the mysterious, and the passion of curiosity to seek to

know more. Rowan/Aquarius is also unpredictable energy, especially when we are “out of focus and unaware.”

Rowan is also a Transition Time, for during her time she sets us at the doorway of Spring, while helping us to move beyond Winter. That doorway time is called Imbolc (im - milk). It is celebrated on February 1<sup>st</sup> and honors the Milk of the Divine Mother spilling out to all life. Known to the Celts as the time of the Ewes feeding their babies, there is also the reverence to Brighid, a triple Goddess: Maiden, Mother, Crone — New Life (Maiden) springing from the Mother as the Old Mother of Winter gives way to the light of Spring. The Festival of Eight Lights of Brighid was used to honor the New Life and continued abundance as the land gave way to new growth beneath the snows of Winter. Later, that festival of lights became Candlemas. The festival of the Lights of Imbolc is found on page: <http://facesofwomanspirit.com/pdf/Imbolc%20for%202010.pdf> . May I suggest you celebrate it between Feb 1 and Feb 3.

The Power of Focus is most certainly a field of energy being brought from the Higher Mind. The ability to use it most certainly depends on each individual’s use of their own cognitive intention. One must hold the intention to use their higher mind in order to be directed to the positive outcomes of life events. One must be deliberate in their focus

The attention through this lunar cycle is also a field of energy that calls for the clarity from within and the open consciousness is not only the human mind, but the Mind of the Whole that interacts through the Whirling Lights we call “Chakras.” The focus of the Whirling Lights is to realize their state of clarity or clutter and is only done by inner reflection, inner awareness of the subconscious layers of one’s self through the power of deliberate focus.

In order to have the Divine Mind influence on the Vehicle of Receptivity (you), the spheres of whirling lights need to be clear of clutter and whirling freely in alignment with Higher Vibrations of the Divine Mind. Use your practice of inner awareness to check and review your vortices of light and make sure the whirling is brilliant, sharp, clear and active. (Note the messages of the Foundation of Rowan below.)

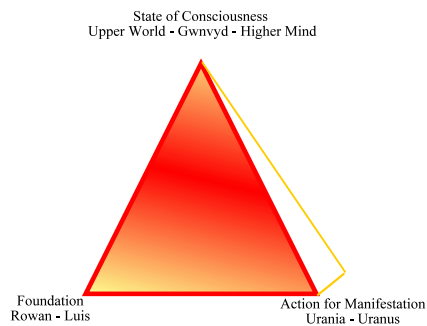

The image of the pyramid at the beginning of this letter honors the vibrant colors of the New Gateway of Air...Soft Shimmering Yellow and Shimmering Ruby Red. These colors will support the energy of Higher Communication levels that Rowan can ask all of us to be aligned with and support in our daily living. The soft yellow encourages us to maintain an open channel with the Divine Mind, while the ruby red calls for the power to communicate the Divine Wisdom. Rowan releases energy that calls our inner knowing into the attentiveness of a clear and open channel. Using the Power of Soft Shimmering Yellow, we can visualize this energy penetrating your brain, both the right and left hemisphere and every cell of the brain. This assists in clearing the old patterns of thinking and believing that have been imprinted in your brain and that you track through thoughts and images of the past. Opening the channel of the brain allows your personal mind to open to Divine Mind, receive the energy of this Higher consciousness and allow It to imprint the tracks of your brain with an ability to take in the higher wisdom and concentrate on the Positive Now, creating your new garden through fresh ideas and functions of a higher mind that can create the power to understand, focus, and reveal unique, innovative and sacred wisdom. The Soft Shimmering

Yellow is the feminine quality of the mind in the new world garden.

The Shimmering Ruby Red is the masculine energy of the new world garden in the gateway of Air. It instigates a higher mental awareness. The mind turns to Solution Power and creates mental acuity that translates the Intelligence of the Divine Mind into the language of human capacity for clarity in comprehension. This vibration brings about truth in communication, no hesitation in speaking the truth, and the wisdom to bring it to the world with clarity. It calls for the vibration of group discussions that leads to social harmony, right choices and the wisdom to eliminate what does not work for the greater whole. It provides a community of creativity for better living through positive discussions and positive inter-actions with one another.

To maintain and live with the clear and open channel, we will work with the Three-in-One qualities of this lunar cycle.

### **Holy Triad of Energies through the Lunar Cycle of Rowan**

**Upper World - Higher Mind:** Using the Power of the Higher Mind, we are still at Causal Moments of awareness as we continue the flow of this year. We have the ability to connect with the ideas/ideals of the Universal Mind through different modalities.

We connect with the Divine Mind through the field of the Celestial Level as we journey with Rowan.

This level of consciousness is the Domain of the Angels (also known as Gods and Goddesses). It is a pure state of consciousness. Unconditional in nature and not cluttered with fear, false beliefs, traumatic memory, or separation from Source, it provides clarity of mind. It is a realm of awareness that guides us to understand the “working of the Universe.” The Perfect Matrix of Life in Its multi-forms is recognizable here. As this is the plane or realm of the matrices of life, it is also the plane in which the laws of the universe are released into use via evolution, individualistic experiences, and the galaxies of all existence. It is the plane of Divine Mind and Divine Love releasing Itself into individual forms. All experiences that will be developed, manifested and evolved are held in this realm and the Angels (gods/goddesses) are the overseers of these individuated processes of life.

It is at this level of consciousness every individual can align with the true vision of the world at peace, the true vision of personal intentions to be fulfilled in the lunar year, and the true alignment with the vision of Humanity living in a community of harmony brought about by humanitarian attitudes. It is a “We” State of Consciousness with a Compassionate Detachment attitude. Service to All is Service to One. Service to One is Service to All. No Interference, yet alignment with Intention to Harmonize, open doors of opportunities, and live the dream created in the Mind of Knowing.

Within this range of the 3-in-one, it is beneficial to connect with a Guardian of the Inner Planes for inspiration, direction, and assistance in working with the Matrix of your desires and weaving the energy into your awareness so you may be the “tender of your vision” and the Master of your diligence to manifest what is given to you into the world of matter. Who is it you would like to connect with? An Angel, a Saint, A god or goddess, A loved One who journeys in the ethers now? Ask for their presence and realize they instantly respond to help, to guide, and to teach.

**Foundation: Rowan-Luis.** The foundation being set by Rowan is one of clarity of mind by deliberate attention given to your thoughts, your feelings and your actions. This is the stable energy provided you throughout this month. Your Free will is to choose to use it.

Through the Power of Focus provided you in the core of your being, this is a time to set your vision with no doubt, no fear and no betrayal from unconscious levels of yourself that I often call the Saboteur. For in this New World of Consciousness and vibration of Causal Energy, you have the empowered state of deliberately setting the design, the color, and the outcome of your dreams you created in the month of Birch. As this is an Air/communication vibration, then the tone and timber of the Sounds of your desires must be heard through the Dimensions. Once you set your intention with clarity, and purpose, take the time to create the Sound of it through prayer and affirmation, song and mantras and other toning realities that instigate the vibration of manifestation. Remember, this is a causal time, so be sure you are clear, concise and filled with knowing that all you vision, speak of and act upon is most certainly already real and you, the caretaker of matter, realize you are the designer of the final form on the realm of matter.

In the Mystical Wisdom of *Rowan*, we find the number 17 and the Law of Luminosity/Illumination. It reveals your Inner Lights (Whirling Lights) are the luminous energy that guides your life, your inner field of awareness, and the direction of the Higher Mind through your Individual Self. Therefore, it reminds you to keep the inner plane of yourself clear of false beliefs and always open for energy and direction of the Higher Field of Wisdom. Daily enter the realm of each Whirling Vortex. Pay attention to how each of them reveal your use of energy:

Root: Use of energy to manifest, ground, and feel Empowered in Physical Reality.

Challenged you may feel: Ungrounded and unsupported, lost in lack, and living without purpose.

Sacral: Use of energy to create, empower, and express the wisdom of your soul.

Challenged you may feel: Depressed, lost in the past, lacking soul-purpose, and ruled by emotional upheavals

Solar Plexus: Use of energy to express yourself, reveal your talents, and live joyfully.

Challenged you may feel: Powerless by the rule of others, incapable of revealing your talents, low self esteem and the need to defend through arguments and the struggle of fighting for your rights.

- Heart: Use of this energy creates excitement with life, anticipation of good, love shared and received. Free to grieve and recover from loss.
- Challenged you may feel: Anxious and left out. Fear of judgment and being unloved. Fear of an inability to love. Grief may overwhelm, and loss is an everlasting fear.
- Throat: Use of this energy creates the power to speak out, reveal truth, open to discussion and wisdom sharing.
- Challenged you may feel: Unable to speak your truth, articulate your wisdom, and share your feelings.
- Brow: Use of this energy excites your mind, integrates your left and right hemisphere activity and opens the channel of non-physical sight. Intuition and Logic works together harmoniously.
- Challenged you may experience: mental confusion, judgement of your intelligence, over use of logic or imbalances of illusion believing you are intuiting life directions
- Crown: Use of the energy aligns you with the higher realms, Divine Mind, and the field of Dimensional thinking. It calls you to Reverence.
- Challenged you may experience: False hope, separation from Divine Awareness, fear, anger or hatred of a Higher Power and belief in separation.

When we take the number associated to Rowan as a Foundation, 17, and we reduce it to one number (1 + 7) we have the number 8. This number carries the vibration of the Law of Self Dominion. When we have all Whirling Lights in alignment, living in the power of Self Dominion is quite easy. We are whole and complete, One in Nature, and Living from a Foundation of Empowerment...nothing can stand in the way of good.

**Action for Manifestation: Urania.** Urania gives us the action to be free to cultivate desires of our Soul through the agency of Unconditional Love. Urania sings out the message within our mind and heart to Love all that we do, all that we encounter, and all that we want to do. Therefore our Action is Love. The secret is out with Urania...The Secret is the Universal Law of Love. For Goddess So Loved the World She Gave her Begotten Children the power to live from love and cultivate higher desires.

In this action, the innovative child creates from fresh and new ideals and what has existed before does not matter. Only the Moment, only the uniqueness of the ideals impressed are used to weave the dreams of today into the beauty of colorful designs manifest now. The action is the

Power of the Free Will and Choice of your soul. The Action is to live what you feel is true and inspired from the inner planes of pure creativity. At times chaos may be used to stir the insights for creating something fresh and new....listen to the wisdom that comes from the chaos. Use it, for without its use it remains chaotic in mind and emotions and is not brought into the world of materialization.

In the mystical wisdom of numbers, Urania is associated to 0 and 22. The 0 carries the vibration of Unconditional Love, opportunities abounding, the power to be free to express your soul. The beauty of the number 22 is the Law of Productivity and the Mastery of Cause and Effect so you are producing all outcomes from original ideas, visions and excitement of desire. The Master who is so productive does so because worry, fear and the saboteur no longer exists.

May your month of mental clarity, lead you to the heart of your intentions and the Spirit of Purpose.

Love and Light in the Grace of Be-ing,

Katherine

New Moon - January 22/23

Crescent Moon - Jan 26

First Quarter Moon - Jan 30

Gibbous Moon - Feb 3

Full Moon - Feb 7

Disseminating Moon - Feb 10

Last Quarter Moon - Feb 13

Balsamic Moon - Feb 17

Next New Moon: Feb 21
